

\$5 Client Revenue Kit - Free Preview

A compact kit for freelancers and small service businesses that need cleaner client conversations around pricing, deposits, late payments and scope creep.

What the full kit includes

- 25 ready-to-use client responses.
- 6 mini-systems for quoting, deposits, payment follow-up, scope control, upsells and referrals.
- 10 AI prompts to adapt each message to your tone and situation.

Sample script 1: When they ask for price without context

Thanks for reaching out. To give you a fair price, I need to understand three things: the result you want, when you need it, and what material you already have ready. If you send me that, I will reply with a simple proposal covering price, deliverables and timeline.

Sample script 2: When they ask for a discount

I can adjust the budget if we reduce the scope. To keep quality intact, instead of lowering the full price, I suggest removing [optional part] and bringing it to [reduced price].

Sample mini-system: 3-line quote

Use this structure before starting any small client project:

- Result: what the client receives.
- Scope: what is included and excluded.
- Conditions: price, deposit, deadline and revisions.

Full product price: USD \$5

If one script helps collect a late payment or avoid one unpaid revision, the kit has paid for itself.
